

NRO REVIEW COMPLETED

COR-1761

Cy 5 of 5

15 August 1962

MEMORANDUM FOR: Chief, Operations Division, OSA

SUBJECT : CORONA Summary for Dr. Scoville

1. As an item arising from our briefing of Dr. Scoville 14 August, I would like to assign to you the responsibility of preparing by COB 20 August a summary of the CORONA/ARGON results in terms of missions launched and recovered along the lines of  presentation, utilizing supplemental graphics modeled after those to which Dr. Scoville referred in the meeting.

2. I think we should place special emphasis upon our 1962 accomplishments both in terms of launches and successful recoveries, and let us also not fail to give ourselves credit for early stage engineering launches in our total box score. I would appreciate it if you could have a draft of a proposed memo to the DCI on this subject for discussion NLT 17 August.
